

800XP = p<sup>2</sup>

## Hawker Theory of Productivity.

Space and time. Both are relative to your productivity. Choose the midsize jet that maximizes both.

The Hawker 800XP's standup cabin leads the class, offering plenty of room to work, relax and stretch out—even on long trips. In fact, the 800XP can take you farther, with more payload, than any other midsize business jet. This combination of comfort, dependability and performance is the reason more businesses have chosen the 800XP than any other comparable aircraft.

So, all things being relative, the Hawker 800XP truly *is* the intelligent choice. For more information, contact a Hawker sales representative at (316) 676-5034. Or visit us on the web at [www.raytheonaircraft.com](http://www.raytheonaircraft.com).

*The use of business aircraft "can and does contribute directly to shareholder value by improving performance at every level."*

*— Arthur Andersen, 2001*

## TRAVEL HAS BECOME MORE COMPLEX.

*Your company will create an extra 30 days of productive time for those individuals who would have otherwise lost time due to "business travel."*

*— JD Power and Associates, 2001*

*With business aircraft, you have access to approximately 5,400 airports in the United States compared to only 580 served by the scheduled air carriers.*

*— National Business Aviation Association, 2001*

business aviation  
makes sense for you.

# SAVE TIME. MAKE MORE OF IT.

Business has always been about productivity and peak performance. Consider the advantages of using business aircraft:

**Increase productivity.** Avoid overnight stays and commercial flight delays when you fly in a private, controlled office environment.

**Keep a flexible schedule.** Reach new clients and new markets efficiently as you fly on your schedule, with the ability to reach many more airports.

**Promote a strong company image.** Corporate aircraft indicate sound financial management and a commitment to customer service.

For more information about business aircraft solutions, call 316-676-5034, fax the enclosed form to 316-676-6614 or visit [www.raytheonaircraft.com/mk/solutions](http://www.raytheonaircraft.com/mk/solutions).

## SAFETY FIRST

Today's business landscape has changed. Which is why some of the world's most successful companies rely on business aircraft to ensure that their most important customers and employees arrive at their destinations safely, on time, and ready to do business. Plus, business aircraft put you in complete control of your aircraft's schedule, passenger list, pilot assignments and maintenance schedules.

## BOTTOM LINE PERFORMANCE

You may be surprised at the range of financial advantages. No longer is operating your own aircraft an "extravagance" your company can't afford. Instead, a business aircraft is an investment opportunity that you can't afford to overlook, including:

- flexible financing options
- attractive depreciation and resale figures
- very specific tax advantages

*Five-year tax savings example based on \$6 million aircraft utilizing a five-year depreciation schedule*

— NBAA, 2001

## AN AIRCRAFT FOR EVERY MISSION

Raytheon Aircraft builds and designs some of the world's most innovative and capable aircraft, delivering the perfect combination of performance, comfort and value. Wherever your destination, whatever your mission, Raytheon Aircraft has a new or pre-owned aircraft solution that's right for you.
