

800XP = p²

Hawker Theory of Productivity.

Space and time. Both are relative to your productivity. Choose the midsize jet that maximizes both.

The Hawker 800XP's standup cabin leads the class, offering plenty of room to work, relax and stretch out—even on long trips. In fact, the 800XP can take you farther, with more payload, than any other midsize business jet. This combination of comfort, dependability and performance is the reason more businesses have chosen the 800XP than any other comparable aircraft.

So, all things being relative, the Hawker 800XP truly *is* the intelligent choice. For more information, contact a Hawker sales representative at (316) 676-5034. Or visit us on the web at www.raytheonaircraft.com.
